## GAMING HEADSET SETUP

1. Connect the headset to a source (computer, gaming console, etc.). Use the 3.5mm Male-to-Female Y-Splitter cable adapter included if necessary.
2. Plug the USB connector to any available USB port. (Be aware that this is an optional step and is only used to activate the LED display. This does not affect the overall audio/headset functionality.)
3. Your headset is now ready to use! Open your computer's sound settings to fine-tune the headset to your liking. Some gaming consoles require users to route the audio to the headset from the console's main audio settings. Please refer to your console for specific instructions.

<sup>1</sup> Works with Xbox One controllers with a 3.5mm headset jack. Other XboxOne controllers require the Headset Audio Controller (Sold Separately).
